## Competency

- A validation system that simply and efficiently demonstrates an individual's professional competency to undertake a specific job role in conjunction with regulated qualifications
- A validation system which would contain a cost effective, fit for purpose, pan sector common accord for qualifications, courses or CPD
- A collaborative effort through Industry, Awarding Body representation and Digital Credentials

## Advantage

- Demonstrating competence of individuals using an existing regulated qualification system
- Strong emphasis on authenticity and visual validation

## Digital First

- Validation Passport: Held on a digital device (mobile phone) links to a dedicated technical system securely holding all validation

## Advantage

- Creates an instantly recognisable brand throughout any industry
- Using a digital first approach cost effectively to employers and contractors

## Workplace Safety

- Visual/audible evidence of skills, knowledge and competency
- Minimises risk of fraud

## Advantage

- Through the qualification route - a validation of 100% capability and efficiency of an individual
- Through a course or CPD route - confirms and validates attendance, agenda, programme and host details

## Inclusivity

- System is accessible
- No tests involved
- A robust system for fast time turnaround for the issuing of Validation Passports

## Advantage

- Current visual/audio confirmation of skills, knowledge and/or competence
- Corroborates authenticity of individual

## Health and Safety Wellbeing

- Would be a huge advantage and opportunity for bespoke, job role specific qualifications, courses and CPD
- Opportunity to incorporate mental health awareness into new qualifications, courses and CPD, and the Validation Passport

## Advantage

- Has the flexibility and ability to address and include competency validation in key topical areas, i.e. mental health

## Collaboration

- Provides robust Quality Assurance and Audit
- Only experienced and qualified trainers, assessors and quality auditors involved in obtaining validation evidence

## Advantage

- Available for an already established infrastructure of Independent Training Providers, Awarding Organisations and Professional Course deliverers
- Is appropriate for pan sector industry

## Responsive and Innovative

- Supports employability programmes particularly through DWP
- Supports the Government's Construction Playbook for the construction industry, Lifetime Skills Guarantee and Plan for Jobs for the wider sectors

## Advantage

- Creates an innovative digital system designed with the future of validation, safety and authenticity in mind
- An integral part of encouraging young people, male and female into a life of careers through a professional step by step approach
- Creates a database of validated professional people
